### DETAILED ACTION

This application is in condition for allowance except for the following formal matters:

Claims 2 and 5 contain claim objections.

Regarding claim 2, the phrase "for example" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Regarding claim 5, the phrase "like" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "or the like"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Please correct the 35 USC 112 issues on claim 2 and 5.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

### ***Allowable Subject Matter***

Claim 1 is allowed. The reason for allowance is because no prior art discloses string extraction based on multiple stroke width pattern by using the specific order as recited in independent claim 1.

Art Unit: 2624

Prior art Hotta et al. (5581663) discloses a method for string extraction but does not disclose binerizing nor clustering the information.

Prior art Abe (5228095) discloses binerizing method for character recognition but not for string extraction using multiple stroke widths.

Prior art Mori (5050224) discloses character recognition apparatus but does not disclose the steps as recited in independent claim 1.

Prior art Valdes et al. (5438656) discloses storing characters by using binary representations of the data. However, he does not disclose using this for identifying multiple stroke widths.

The above features, as explicitly recited, and in combination with the other elements of the claim are neither disclosed nor suggested by the nearest prior art of the record.
